

# Project Proposal

Machine Learning for Public Policy

*Cheng Yee, Rodrigo Velez, J.Adrián Sánchez*

*April, 2017*

## Project goals

### Problem definition

### Importance

### Impact

### Who cares

### Who will take action based on your work

### What are the policy goals you care about?

## Data

## What you have ## What you need

## Analysis

## What kind of models will you apply?

## What actions will this enable or improve?

## Evaluation

## How would you evaluate the models, what metrics?

## Policy recommendations:

## What kind of recommendations do you hope to give to policymakers based on this analysis/project. ##  
How will you validate whether what you are proposing will have the desired impact?
